Recommendations

- Incentivise month-to-month subscribers to switch to annual contracts through discounts, free months, or service upgrades to lock in retention early.
- Implement a 90-day onboarding programme with check-ins at day 7, 30, and 90 to engage new customers before they disengage during the critical first-year window.
- Audit the Fiber Optic experience and introduce a 12-month price-lock guarantee or complimentary Tech Support bundle to close the price-to-value gap driving premium customer churn.
- Offer free 3-month trials of Tech Support and Online Security to single-service, month-to-month customers to increase switching costs and improve perceived value.
- Run a targeted campaign migrating electronic check users to automatic payment methods with a small monthly discount to reduce payment friction and disengagement.
